

WELCOME TO GREEN HORIZONS!

YOUR SPACE TO TURN CLIMATE ANXIETY INTO ACTION.

Hey!

Did you know that 60% of young people aged 16–25 say they feel sad, scared, angry, or helpless about climate change? That's a lot of us.

But there's something powerful happening. **When young people step into climate activism—whether online or in their communities—they start to feel empowered.** Like they're finally doing something that matters. Like they can shape their own future.

That's where Green Horizons comes in. This project is all about giving young people the tools, knowledge, and community they need to step up and lead. **Together with youth organisations across Europe, we're working to close the gap between institutional politics and grassroots movements—because climate action needs all of us.**

We know that some people feel disconnected from both traditional institutions and radical activism. **Green Horizons is here to offer a third path: one where youth-led change is smart, inclusive, and loud enough to be heard** in every room where decisions get made.

This is just the beginning. Stay with us—we've got big plans, and they start with you.

So what's the goal?

Green Horizons is here to help young people understand the climate crisis—and take real action.

We're not just talking about raising awareness (though that's a big part of it). **We're talking about giving you the skills, the knowledge, and the support** to actually do something—in your community, your country, and across Europe.

Together, we'll:

- **Build** your confidence as a climate activist
- **Explore** how to start your own youth-led NGO
- **Create** digital tools and guides that make eco-activism easier and safer
- **Connect** you with other young people and organisations who care, just like you do
- Show you how to **engage** with politics without losing your voice or your values

Whether you're already active or just starting out, Green Horizons is designed by and for young people. **We believe that your ideas and leadership are essential—not optional—for tackling the climate crisis.**

And the best part? You're not alone. We're building a Europe-wide community of youth leaders who care deeply, act boldly, and bring others along with them.

Kicking Things Off in Italy!

Our journey officially began with the **Kick-Off Meeting** on May 26–27, 2025 at Eurobox's office in Bologna, Italy!

Over the next two years, we'll roll out local, digital, and international activities—including:

- Online meetings
- A Learning Mobility & Bootcamp
- Events in each partner country
- And a Final Meeting to wrap it all up!

The project focuses on **four big goals**:

1. Tools for political engagement
2. Launching youth-led climate NGOs
3. Building an online incubator
4. Connecting youth & institutions across Europe

What Will Green Horizons Deliver?

We're working on 3 exciting results to empower young people like you:

◆ R1. Digital Activism Toolkit

A go-to resource packed with tools and ideas to help young people and youth workers lead climate action online.

◆ R2. EU Participation Guide

A youth-friendly guide to getting involved in EU politics—with a climate focus. Because your voice does matter.

◆ R3. Online NGO Incubator

A platform with everything you need to start your own youth-led climate NGO—skills, templates, and real-world advice.

And yes—all of this will be available in Italian, Spanish, Swedish, and Turkish.

◆ We're already online!

Meet the Green Horizons Team

This project brings together an amazing consortium of youth-focused organisations from across Europe:

Eurobox (Italy) – Project Coordinator

Ayuntamiento de Maracena (Spain)

Youth Eurasia (Turkey)

Solidaritet för Ungdomens Framtid (Sweden)

Via Kreaktion (Germany)
